
Figure C.9: Sensitivity analysis - parameter ν_0, SA-APAC region. We report the differences in d, c/y, u/y obtained for $\nu_0 = 1.2\nu_{0,b}$ and $\nu_0 = 0.8\nu_{0,b}$, $\nu_{0,b}$ being the baseline value of the parameter, in case of d we plot $d_{1.2\nu_{0,b}} - d_{0.8\nu_{0,b}}$, see Figure 4 for details and plots of the baseline parameter.
